HTML Background Images

< Previous

Next >

A background image can be specified for almost any HTML element.

Background Image on a HTML element

To add a background image on an HTML element, use the HTML `style` attribute and the CSS `background-image` property:

Example

Add a background image on a HTML element:

```
<p style="background-image: url('img_girl.jpg');">
```

Try it Yourself »

You can also specify the background image in the `<style>` element, in the `<head>` section:

Example

Specify the background image in the `<style>` element:

```
<style>
p {
  background-image: url('img_girl.jpg');
}
</style>
```

Try it Yourself »

Background Image on a Page

If you want the entire page to have a background image, you must specify the background image on the `<body>` element:

Example

Add a background image for the entire page:

```
<style>
body {
  background-image: url('img_girl.jpg');
}
</style>
```

Try it Yourself »

Background Repeat

If the background image is smaller than the element, the image will repeat itself, horizontally and vertically, until it reaches the end of the element:
